

Morgan House
SM-689
121 Three Notch Road (MD 235)
California vicinity
Circa 1940
Private

The Morgan House was most likely built *circa* 1940 before the establishment of the Patuxent Naval Air Station (NAS) in 1942. Prior to the formation of NAS, the county's economy was primarily based upon agriculture (tobacco) and fishing, and very little modern development was evident in this portion of the state. With the subsequent influx of workers to construct and maintain the NAS in so short a period, residences were constructed near the base, and later spread to outlying areas along Three Notch Road (MD 235); intense modern commercial development has occurred within the past decade, further transforming the landscape.

This 1-story gable-roof frame house is in very poor condition and does not clearly relate to either agriculture or fishing. The dilapidated house and associated sheds have been surrounded by the residential development that occurred during the 1940s and 1950s and later by recent modern commercial construction.

7. Description

Inventory No. SM-689

Condition

<input type="checkbox"/> excellent	<input checked="" type="checkbox"/> deteriorated
<input type="checkbox"/> good	<input type="checkbox"/> ruins
<input type="checkbox"/> fair	<input type="checkbox"/> altered

Prepare both a one paragraph summary and a comprehensive description of the resource and its various elements as it exists today.

The residence at 121 Three Notch Road (MD 235) is located approximately 50 feet east of the road in an area characterized by mixed residential and commercial uses. A heavily wooded area surrounds the house, which is currently vacant and in a dilapidated condition. Two dilapidated frame sheds (one modern and one contemporaneous with the house) are situated east of the dwelling. A circular gravel driveway is located on the north side of the property.

The 1-story ell-shaped frame building clad in asbestos shingles is supported by a concrete block foundation. The house has an asphalt shingle and tar gable roof with an internal brick chimney in the south end of the building. A one-story gable-roof ell extends from the north side of the dwelling and a shed-roof addition (with a small shed-roof ell in the elbow) is appended to the south side. A partial-width enclosed porch with a flat roof is located on the west elevation of the dwelling. Windows throughout the house consist of six-over-one double-hung sash; many of the windows have been covered with plywood.

The west, or main, elevation consists of a central door flanked on either side by a six-over-one double-hung sash window under the enclosed porch. A louvered vent is located in the gable end. The south elevation contains two single six-over-one double-hung sash. The east elevation of the main block includes a single six-over-one window and a louvered vent in the gable. A plywood covered bay is located in east elevation of the shed-roof addition. The north elevation contains two six-over-one windows in the east end, a single six-over-one window in the west end, and a screen-enclosed gable-roof entry porch in the center bay.

Specific dates Circa 1940 **Builder/Architect** Unknown

Evaluation for:

☒ National Register ☐ Maryland Register ☐ not evaluated

Prepare a one-paragraph summary statement of significance addressing applicable criteria, followed by a narrative discussion of the history of the resource and its context. (For compliance reports, complete evaluation on a DOE Form - see manual).

The Morgan House was most likely built *circa* 1940 before the establishment of the Patuxent Naval Air Station (NAS) in 1942. Prior to the formation of NAS, the county's economy was primarily based upon agriculture (tobacco) and fishing, and very little modern development was evident in this portion of the state. With the subsequent influx of workers to construct and maintain the NAS in so short a period, residences were constructed near the base, and later spread to outlying areas along Three Notch Road (MD 235); intense modern commercial development has occurred within the past decade, further transforming the landscape.

This 1-story gable-roof frame house is in very poor condition and does not clearly relate to either agriculture or fishing. The dilapidated house and associated sheds have been surrounded by the residential development that occurred during the 1940s and 1950s and later by recent modern commercial construction.

It is unlikely that historic or prehistoric archeological resources are preserved on this property. The extensive disturbance typically associated with construction during the last 50 years is likely to have displaced any archeological resources that may have been on this property. Similarly, commercial and residential development in the vicinity make the survival of archeological resources on adjacent properties unlikely.

Historical documentation does not indicate that this resource is associated with Criterion A, broad patterns of history or a significant event or Criterion B, an important person who contributed to local or state history. The property does not embody distinctive characteristics of a type, period, or method of construction nor does it represent the work of a master or possess high artistic value; therefore, Criterion C, architecture, does not apply. Lastly, the property is unlikely to yield information which contributes to our understanding of human history. As a result of recent modern development in the immediate area, the property lacks integrity of association, feeling and setting. The dilapidated condition of the residence has somewhat compromised the dwelling's integrity of design, materials, workmanship and location.
